

Full Stack Developer | Frontend & Backend | UI/UX Designer | Web Developer

I am a Full Stack Developer with over six years of experience in frontend and backend web development. I design interfaces in Figma and Adobe XD, then build them into fast, responsive apps using React JS, Next JS, Node.js, and Express. My work spans complete web application development, from database design to deployment, with strong UI/UX and API integration skills. I have built and maintained full-stack CRM systems, resolved complex bugs, and delivered new features across client projects. I also completed additional training in digital marketing and SEO, which helps me build websites that perform well and reach the right audience. What excites me most is solving real business problems through clean, well-engineered code.

CORE COMPETENCIES

- Frontend Development
- UI/UX Design & Prototyping
- Responsive & Mobile-First Design
- Full Stack Development
- Cross-Functional Team Collaboration
- Analytical Problem Solving
- API Integration & Backend Logic

WORK EXPERIENCE

Software Developer (Frontend & Backend)

Dubai Silicon Oasis, Dubai, UAE

Brandxb

Feb 2026 – Present

- Developed and maintained the Brandxb Growth CRM, a full-stack application built with React, Vite, and TypeScript on the frontend, and Node.js, Express, and SQLite on the backend.
- Migrated backend infrastructure from Render to Railway, resolving persistent data storage issues and improving application reliability.
- Diagnosed and resolved critical bugs, including data inconsistencies, permission mismatches, and UI issues across the CRM platform.
- Implemented new features such as international phone number input, automated agreement toggles, and rule-based deal-status transitions.

UI/UX Developer & Designer

Infopark, Kochi, Kerala, India

Armia Systems

Nov 2023 – Jan 2026

- Developed fully responsive web applications using React JS and Next JS, ensuring seamless user experiences across all device sizes.
- Converted Figma and Adobe XD design files into pixel-perfect UI pages using Tailwind CSS and SASS for maintainable, scalable styling.
- Created wireframes, interactive prototypes, and conducted user discovery sessions for both mobile and web applications.
- Implemented technical SEO best practices including meta tags, structured data, & image optimization to boost page rankings.
- Optimized website performance by reducing load times through code splitting, lazy loading, & asset compression techniques.
- Collaborated closely with backend developers and the UI/UX team to integrate frontend components with server-side logic.

UI Developer & Designer

Technopark, Trivandrum, Kerala, India

M Squared

Feb 2020 – Nov 2023

- Built custom, responsive websites from scratch using HTML5, CSS3, & JavaScript, ensuring brand consistency and accessibility.
- Developed reusable UI components and template libraries, reducing development time for subsequent projects.

- Ensured cross-browser compatibility and performance across Chrome, Firefox, Safari, and Edge browsers.
- Integrated static websites with WordPress CMS, empowering marketing teams to update content independently.
- Worked alongside design and marketing teams to align visual identity with campaign goals and user needs.

EDUCATION

Master of Computer Applications (MCA) – 2015 – 2017

Excel Group Institutions | Anna University, Tamil Nadu, India
